There is a widely held belief that Thomas Cook invented the railway excursion. In fact, the railway excursion is almost as old as the railway itself, dating back to the 1830s, when hordes of people from one town would descend on another for a 'cheap trip'. Susan Major has carried out much in-depth research for this book, drawing on contemporary Victorian newspapers, and discovered that in fact Cook played a very minor role, mainly in encouraging middle-class people to go on more expensive excursions. Her book fills an important gap in railway history.
